Tensile strength	0,500 N/mm ²
Flame Resistance (EN 13501-1)	E

Material information

Regupol 6510G is a universally applicable polyurethane (PUR) bonded rubber granulate. The material is compounded from recycled rubber and is shock absorbent. Our environmental management system (ISO14001) has enabled us to set up a zero-waste production process. The cutting remnants and packaging materials are recycled again at ODV so that the processing is also sustainable.

Usage examples

Regupol is used as (under) flooring, tile supports, runners on roofs, sound insulation and as a sealing strip. Decoupling between paving and facades.

Processing

In our own three production lines, we can produce Regupol strips, cubes and sheets in any size and number, package (e.g. in a sealed in our shrink tunnel) and label (e.g. for private label products). Special applications and shapes are also possible by means of a die-cutting machine (70 tons die-cutting).
