

This glass cloth fabric is coated on two sides with polyurethane

Color [color\\_gre](#)  
Tensile strength 7,400 N/mm<sup>2</sup>

## Material information

This glass cloth fabric consists of a woven E-glass material with a warp of 5.5 per cm and an insertion of 3 per cm. The thickness is about 1.5 mm and weight 1130 grams per m<sup>2</sup>.

## Usage examples

Suitable as protection in welding operations and for various industrial applications.

## Processing

In our sewing workshop, we process this material into various cuffs and seals.

Measurement tolerance 7715-P3

## Item Overview

Item Code	Item Name	Width (mm)	Length (mm)
53600010	Glasdoekweefsel W1080 (2x alu grijs gecoat, 1150 gr./m <sup>2</sup> )		

*We provide product information as known by us with great care. We cannot accept any liability for errors and/or inaccuracies and/or incompleteness. Please note that our products are intended for professional use only. For high impact applications and/or combinations of limit values we always recommend to have the properties specific to that situation verified by us. If there are multiple specifications for a product we will use the standard of 2mm or the closest specification.*
